Abhishek Rai

Software Engineer | React, Node.js, MERN Stack Developer

E: raigon48@gmail.com | P: +91-9686072900 | [linkedIn](#) | Bengaluru, Karnataka

SUMMARY

Web developer with 5 years of experience building ecommerce applications and microservices using React, Node.js, and Azure. I thrive in collaborative environments where my curiosity and passion for innovation shine. I'm a strong communicator who believes in the power of teamwork to create impactful solutions.

EXPERIENCE

Software Engineer

EPAM Systems   *(Nov-2020 – Now) Bengaluru*

Worked for Canadian Tire Corporation (client) developing their e-commerce application and digital transformation.

- Orchestrated the transition from on-premise infrastructure to the cloud, utilizing Azure to improve scalability and reliability.
- Developed an Automotive Online Appointment Service for scheduling maintenance and repair services.
- Integrated new company acquisitions under a unified development platform, streamlining operations.
- Created a Rewards Points Transfer Program that allowed customers to use partner company reward points.
- Developed an award winning chatbot service integrated with ChatGPT, enhancing the shopping experience for automotive products.
- Collaborated with DevOps to minimize service downtime, ensuring higher system availability.
- Optimized application performance to handle heavy traffic during festive seasons, improving user experience.
- **Used**: Node.js, TypeScript, React, Azure, Microservices, Docker, Kubernetes

Web Developer

Keitai Technologies (Openly) Startup   *(Nov-2019 – Oct-2020) Bengaluru*

Responsible for developing and implementing Retail delivery application and Admin panel.

- Designed and developed a comprehensive admin and support dashboard using React providing real-time data insights and improved user management.
- Developed feature-rich B2C mobile apps using Cordova Hybrid Apps, delivering a seamless cross-platform user experience.

STRENGTHS

Problem Solving

Resolved complex application issues in previous role delivering a 40% reduction in long-standing unresolved problems.

Collaboration

Worked with cross-functional team in the successfully executing critical projects on time and budget.

Adaptability

Quickly adapted to and learned to work across various projects and teams within a scaled agile framework, enhancing efficiency.

SKILLS

Languages/Framework: React, Next.js, Node.js, Express, HTML, CSS, JavaScript, TypeScript

Technologies: Docker, Kubernetes, Azure, Microservices

Database: PostgreSQL, MongoDB

CERTIFICATION

AZ-204 : Azure Developer Associate

AZ-900 : Azure Fundamentals

- Integrated essential functionalities into hybrid apps, including deep linking, firebase notifications, image compression, improving app performance and user interaction.
- Designed and built a scalable catalog management tool for managing over 36K FMCG items, ensuring efficient data handling and fast retrieval.
- **Used:** JavaScript, React, Cordova, Firebase, PostgreSQL

EDUCATION

B.Tech in Computer Science | 8.09 CGPA

Reva University   *(Aug-2015 – Aug-2019) Bengaluru*
